Mitsubishi Auto Leasing Corporation

### Announcement Regarding Participation in Fleet APAC Summit 2025

Mitsubishi Auto Leasing Corporation (hereinafter "MAL") announces that it participated as a Diamond Partner Sponsor in the "Fleet APAC Summit 2025," held in Bangkok, the capital city of the Kingdom of Thailand, from June 10 to 12, 2025.

At this Summit, four companies jointly participated: MAL, its parent company Mitsubishi HC Capital, Ayvens — which has signed a global partnership with MAL in Japan — and SG Fleet, an Ayvens global partner covering Australia and New Zealand. The four companies made joint presentations focusing on vehicle-specific TCO (Total Cost of Ownership), EV introduction and consultation programs, as well as fleet management solutions.

Based on the global partnership with Ayvens, MAL aims to provide all customers in Japan with high-quality and highly convenient comprehensive fleet management and mobility services.

(\* Ayvens)

Through the [Ayvens & Wheels Alliance](#) and their global partners, with Ayvens at its center, coverage extends to 59 markets worldwide, making it one of the largest auto leasing groups in the world.

Ayvens is committed to the energy transition and to supporting its clients in their transition, notably by developing products and services, such as consultancy, EV programs and alternative mobility options.

MAL entered into a global partnership agreement with Ayvens in April 2020.

#### ■ Comment from Takehisa Usami, Executive Officer

We are pleased to continue our participation in this Summit, following our involvement in the inaugural event last year. Across the APAC region, each country faces differing conditions regarding the supply of various vehicle models, the development of infrastructure, and the availability of subsidies for EV promotion toward a decarbonized society.

In Japan, challenges remain—including the unclear advantages of EV adoption from a TCO perspective, a limited lineup of EV models, and issues related to driving range and charging infrastructure. Nevertheless, by working closely with our global partners, we will continue to provide solutions tailored to each customer's specific issues and needs.

#### ■ Fleet APAC Summit 2025 Highlights

#### ■ Company Overview

Mitsubishi Auto Leasing Corporation provides comprehensive solutions related to leasing, maintenance, and other auto and mobility services. In recent years, we have been placing particular emphasis on offering EV solutions to support customers' efforts toward decarbonization and carbon neutrality, mainly through the introduction of EVs.
